To the Warner River Nomination Committee:

The Bradford Conservation Commission offers its support to the Warner River's inclusion in the NH River Management and Protection Program. Bradford has more than a few potential sources of negative impact on the river – some reaching back generations.

This initiative would give recognition to the value of the river and its tributaries and provide a source of information and education to riverfront owners and other residents that use the river.

Its main benefit might be in assistance in funding for river projects, perhaps including remediation as needed and technical assistance from NH DES.

Sincerely,

October 18, 2016

J. Ann Eldridge, chair, Bradford Conservation Commission
